PROFESSIONAL SUMMARY

Business analytics professional with Big Four experience at Ernst & Young, leveraging AI & workflows also passionate about Building hands-on AI and automation experience, with a growing interest in applying data-driven and GenAI tools to real operational problems. Skilled in tracking complex cross-border financial engagements, validating large datasets for accuracy, and translating research findings into clear outputs for senior stakeholders. Proven track record of delivering high-quality work fast with minimal

WORK EXPERIENCE

Analyst – Tax, Ernst & Young, Bengaluru

July 2025 - Present

- Standardized a compliance-tracking system across **1000+ cross-border engagement lifecycles**, cutting process variance across APAC stakeholders.
- Re engineered the reporting cadence after surfacing inefficiencies through independent data analysis, **driving a 10–15%** improvement in turnaround time.
- Contributed to an **AI-assisted onboarding pipeline** built in Power Automate, streamlining new-engagement setup steps.
- Identified reporting inefficiencies through data analysis and escalated findings independently to senior management, driving a **10–15%** improvement in turnaround a clear demonstration of bias to action.
- Automated document governance through structured SharePoint protocols folder templates, access-provisioning rules, and client collaboration spaces.

Logistics and MIS Intern Universal Electro Engineering (UNEECO) Intern, Bahrain

May 2024 - Jul 2024

- Analyzed **10 years of consumer data**, identifying trends and key insights, with over **25+ hours dedicated** to data analysis.
- Structured a weekly shipment-review cadence across 10 shipments, converting manual inspection steps into a repeatable procedure improving procurement efficiency by 15%.
- Operated ERP-based operations in Epicor, processing 50+ invoices and 10+ GRNs grounding in the same systems logic now applied to spotting where agentic tools could compress similar manual steps.
- Analyzed 10 years of consumer data to surface patterns feeding procurement process design.

Skills - Python, SQL, JSON, Git, Claude(GenAI-assisted development), REST API integration, Model Context Protocol (MCP), Power Automate, SharePoint

EDUCATION

CHRIST (Deemed to be University)

Bachelor of Business Administration, Business Analytics

GPA: 8.6/10

Bengaluru, Karnataka

Aug 2022 - May 2025

The Asian School

CBSE Class XII

CBSE Class X

Manama, Bahrain

2021-2022

2019-2020

PROJECTS

Algorithmic Trading System - NSE / Zerodha (Python)

Designed and developed an **event-driven, asynchronous trading framework** with **5+ independent modules**, leveraging WebSocket's for real-time market data and a scalable architecture for strategy experimentation and back testing.

YouTube Semantic Search Tool - Claude API | JSON | CSS | Python | ChatGPT

Engineered and iterated three versions of a natural-language YouTube search tool that routes queries through Claude's web-search capability and re-ranks results via prompt engineering; final build needs no YouTube Data API key.

City Bus Network Performance Analyzer -

Designed a 10-table normalized database modelling Bengaluru's urban transit network, writing complex queries using JOINS, CTEs, GROUP BY and CASE WHEN to analyze delay patterns across 8 routes Identified Route 401 as the highest risk route (34% above city average delay) and flagged 2 buses for maintenance, demonstrating end-to-end analysis from schema design to actionable recommendations

SpotIn - Urban Parking Intelligence Platform | Python | HTML

Designed and built an end-to-end concept for a **real-time urban parking intelligence platform (300m-driver addressable market in India)**, including business case, live occupancy simulation, and interactive prototype; built by pair-programming with **Claude** using **Python and JSON** for data handling and GitHub for version control demonstrating hands-on fluency working alongside GenAI tools in a real build workflow.
